

# Helenium ‘Sahins Early’

<b>Selling</b>	April onwards
<b>Features</b>	Large flowers change colour between shades of orange, red and yellow, from July.
<b>Benefits</b>	An excellent show plant, looks exceptionally eye catching in clumps in a border. Shorter than most Heleniums and no two flowers are ever the same.
<b>Story</b>	The Sneezeweed is native to the American mid west and plain states. This variety was bred by Kees Sahin in Holland and is one of the earliest to flower.
<b>Basic Information</b>	
<b>Plant type</b>	Perennial
<b>Flowers</b>	Large bright flowers from July
<b>Height</b>	90cm (3')
<b>Spread</b>	n/a
<b>Position</b>	Thrives in full sun and well drained soil
<b>Hardiness</b>	Hardy
