

Lonicera ‘Scentsation’

Selling

Mid March onwards

Features

Mid green foliage, with bright yellow-cream tubular flowers in late Spring, red berries follow.

Benefits

This climber offers a long period of interest with its flowers and berries. A wonderful scent and repeat blooming make it an exceptional plant.

Story

Found in a Herefordshire hedgerow by John Edmund and Els Wilms, who were attracted by its look and scent. Introduced to the market by Bransford Webbs in 2004.
