

Sedum 'Carl'

Selling

August to September

Features

Green blue fleshy foliage, with intense magenta purple flowers from late Summer.

Benefits

A great late Summer show and wonderful in Autumn. A good garden plant, compact and attractive to bees and butterflies. Flower heads look architectural, once colour has gone, if left throughout the winter.

Story

A form of Sedum spectabile, which is native to China, Korea and Japan. It has been cultivated in the UK since 1596 originally for its healing properties.
