

Helleborus 'Lady Series'

Selling

Mid January through to end of February

Features

Leafy clumps of thick leathery leaves, flowering from February to May. Available in five colours: Red, Blue, Yellow, White and Pink.

Benefits

This easy to grow, small architectural perennial produces delicate eye catching flowers when most plants are still dormant.

Story

The Lady series of Hellebores was bred by the 'Hellebore Queen' (Gisela Schmiemann) in Cologne, Germany. It was introduced to the UK in 2001.
